

Mistletoe Treatment Information and Prices

Generally IV VA will last for 8-12 treatments at maximum tolerated dose (usually 2-4 months) and then patients will be transitioned to injections. * Patients can choose to do IV only or Subcutaneous (SQ) treatment only or both.

Expiration per the pharmacy: The mistletoe lasts at least 2 years and could be up to 3 if refrigerated the whole time.

For longer shelf life, refrigerate and keep in dark amber bag or wrap in foil.

Mistletoe= Viscum Album Extract (VAE)

The Woodlands Institute
for Health & Wellness

Subcutaneous injections recommended following IV series can run 2-5 years. First 2 years are critical.

Dosing will vary, but typically will be 3 injections per week

Cost of injections=\$499 each time new supplies are needed, duration will depend on dose, supplies will last a min of 1 month

**Cost will be higher if dose gets to be greater than 100mg per injection
