

TWIHW Vitamin IV and Injection Protocols

Benefits of IV and Injection Therapy:

- Quick Delivery, Quick Utilization
- Therapeutic doses delivered to the cells
- Improved Energy, resilience to stress
- Immune boosting support
- Immediate rehydration
- Preventative care

The Woodlands Institute
for Health & Wellness

Vitamin IVs				
Hydration	Immune Booster	Rapid Remedy	Detox IV	IV Add -On:
1 Liter Normal Saline	B1/ Thiamine B2/ Riboflavin 5- phosphate B3/ Niacinamide B5/Pantothenic B6/ Pyridoxine HCl Vitamin C Glutathione Zinc	Magnesium Calcium Vitamin C B1/ Thiamine B2/ Riboflavin 5- phosphate B3/ Niacinamide B5/ Pantothenic B6/ Pyridoxine HCl B12/ Hydroxocobalamin	Poly-MVA Glutathione * If you have a sulfa allergy or have been sensitive to sulfa you will need to do an oral challenge 1-2 days before receiving this IV.	Glutathione 1000mg (per 5ml) \$49 Methylcobalamine 5000mcg per ml \$49 Normal Saline 250 to 500ml \$49
Replenishes hydrating fluids	Boost your immune system, alleviate allergy symptoms, feel better faster	This drip is beneficial for those who suffer from acute asthma attacks, migraines, fibromyalgia, muscle spasms, upper respiratory infections, fatigue, chronic sinusitis and seasonal allergies.	PolyMVA is a uniquely-formulated dietary supplement containing a proprietary blend of the mineral palladium bonded to alpha-lipoic acid and Vitamins B1, and also includes B2 and B12, formyl-methionine, N-acetyl cysteine, plus trace amounts of molybdenum, rhodium, and ruthenium. This formulation is designed to provide mitochondrial support and energy for compromised body systems by changing the electrical potential of human cells and facilitating aerobic metabolism within the cell.**	Zinc \$49
Dehydration may not seem like a serious problem; however, it is associated with a long list of health issues including fatigue, headaches, muscle aches, dry mouth, muscle cramps, dizziness, and lack of mental clarity and concentration. Even mild levels of dehydration can reduce productivity by up to 50 percent.	Our immune system is essential for our survival. Without an immune system, our bodies would be open to attack from bacteria, viruses, parasites, and more. It is our immune system that keeps us healthy in our every day lives. If you are traveling, or were exposed to anyone that was sick, or if you feel like you are coming down with cold or flu, or are having an allergy flare up, this drip is for you!	The "Myers cocktail", as it is known, is a specific combination of nutrients seen above. John Myers, MD pioneered the use of Intravenous (IV) vitamins and minerals as part of the overall treatment for various medical problems. This is an enhanced version of the Myers cocktail.	Poly-MVA combined with glutathione in a detox IV, this blend further enhances cellular detoxification and oxidative stress reduction. Glutathione, a master antioxidant, works synergistically with Poly-MVA to neutralize harmful free radicals, support liver detox pathways, and improve mitochondrial function. Together, they help facilitate efficient energy production, promote cellular repair, and aid in the removal of toxins, making this combination an excellent choice for individuals seeking enhanced detoxification and cellular rejuvenation.	Oxygen \$1 per min (10 min minimum)
\$125	\$199	\$199 Basic/ \$275 for Higher dose	\$199 - \$399

Vitamin Injections					
Vitamin C	Vitamin D	Glutathione	Magnesium	Tri-Immune	NAD+
500mg Ascorbic Acid	50,000iu Vitamin D3	200mg Glutathione	200mg Magnesium Chloride	200mg Glutathione 2.5mg Zinc Sulfate 200mg Ascorbic Acid	25mg or 50mg Nicotinamide Adenine Dinucleotide
Encourages wound healing Prevents cell damage Builds collagen	Helps fight disease Antioxidant Helps Bone strength Helps Muscle strength Boosts Weight Loss	Anti- Aging Helps Memory Loss Helps Maintain Body's Defense System Antioxidant Liver detoxifier	Lowers blood pressure Prevents and relieves headaches Decreases anxiety/ depression Lowers risk of osteoporosis Eases muscle cramps Improves cardiovascular health	Decreases inflammation Optimizes healthy cell function Aids in wound healing Strengthens weakened immune system	Fights the physical effects of aging Reduces depression and anxiety Mitigates effects of EMF exposures Combats chronic fatigue Helps autoimmune/ inflammatory diseases Can help with weight management
Ascorbic acid, also known as Vitamin C, is an antioxidant that plays an important role in the body. It not only protects the body's cells from damage, but it is also needed to maintain the health of skin, teeth, bone, cartilage, and blood vessels.	Vitamin D is a fat-soluble vitamin that is necessary for mineral homeostasis and proper formation of bone. The major biological function of Vitamin D is to maintain normal blood levels of calcium and phosphorus.	Glutathione protects cells from free radical damage and helps improve cellular function at all levels (immune function, hormone levels, mitochondrial function, etc.) As people develop chronic illness, glutathione levels decrease. Maintaining adequate glutathione levels is not only critical for wellness but also aids in the recovery process.	Magnesium is important for many systems in the body, especially the muscles and nerves.	Tri-Immune is a power packed immunity blend of Glutathione, Ascorbic Acid and Zinc that is the ultimate immune system enhancer. This high concentration blend of nutrients helps maintain a healthy immune response.	Nicotinamide Adenine Dinucleotide, more commonly referred to as NAD+, is found in every cell in the body and is essential to life. As a coenzyme to Vitamin B3, NAD+ participates in more reactions than any other vitamin-derived molecule. It helps transfer the energy we get from food to the rest of the body and is a cornerstone to maintaining healthy internal organs and neurological systems.
\$30	\$30	\$49	\$30	\$75	\$49/ \$69

Purchase a bundle of 4 or more and receive 20% off!

Formulations cannot be compared with each other on this sheet, nor against other facilities that offer IV drips.
Each drip here is specially formulated by Dr McManus, with many nutrients at higher therapeutic doses.

Advanced IV Therapy

Labs Required	Mega Dose Vitamin-C	PolyMVA	MistleToe (VAE)	Iron (InFed)	NAD+	Ozone/ UBI IV
	*yes	*yes	*yes	*yes	*yes	*yes
About Active Ingredients	Pre-Buffered (pH 7.4) Bacteriostatic Crystalline Powder Sodium Ascorbate (IVC). Sodium Ascorbate harnesses the intrinsic sodium/potassium pump to provide increased intracellular bioavailability compared to traditional Ascorbic Acid formulations.	Poly-MVA is a uniquely-formulated dietary supplement containing a proprietary blend of the mineral palladium bonded to alpha-lipoic acid and Vitamins B1, and also includes B2 and B12, formyl-methionine, N-acetyl cysteine, plus trace amounts of molybdenum, rhodium, and ruthenium. This formulation is designed to provide mitochondrial support and energy for compromised body systems by changing the electrical potential of human cells and facilitating aerobic metabolism within the cell.**	Mistletoe is complementary to conventional cancer therapies and can also be used as a monotherapy if someone refuses, or is not a candidate for, conventional cancer treatments. Mistletoe fights cancer by directly killing cancer cells, as well as stimulating the immune system to fight the cancer. Mistletoe diminishes many of the side effects related to chemo and radiation. Mistletoe contains endorphins that act as natural pain killers and can reduce or eliminate the need for pain medications. Some components of mistletoe repair DNA in damaged cells and protect DNA of healthy cells. It can be used after cancer treatment to help prevent recurrence. There are NO contraindications for using mistletoe with any conventional cancer treatment.	Iron is a mineral that the body needs to produce red blood cells. When the body does not get enough iron, it cannot produce the number of normal red blood cells needed to keep you in good health. This condition is called iron deficiency (iron shortage) or iron deficiency anemia.	Nicotinamide Adenine Dinucleotide, more commonly referred to as NAD+, is found in every cell in the body and is essential to life. As a coenzyme to Vitamin B3, NAD+ participates in more reactions than any other vitamin-derived molecule. It helps transfer the energy we get from food to the rest of the body and is a cornerstone to maintaining healthy internal organs and neurological systems.	IV Ozone Therapy is the removal of a small sample of the patient's blood, diluting it with saline, and enriching it with the addition of ozone. The ozone is produced in an ozone generator from medical-grade oxygen gas, creating O3, which attaches to the red blood cells. Viruses, bacteria, parasites, and fungi cannot live in this highly oxygenated environment.
Benefits	<ul style="list-style-type: none"> • Anti-inflammatory, Natural antihistamine, and neutralizes toxins • Lessens Pain After Injuries • Helps the body heal faster • Improves energy levels/fatigue • Fights infections like colds/flu or other viral/bacterial infections • In cancer patients, IVC is known to improve the response to cancer therapies because it alleviates the side effects of traditional therapies, improves appetite and helps patients remain more active. 	<ul style="list-style-type: none"> • Improved length & quality of life with its anti-aging properties • Extreme effectiveness in boosting the immune system • Aids in weight management • May improve neuropathy • Increased wellbeing and energy levels • Non-invasive support for cancer treatment • Non-invasive support for stroke recovery • Promising help for those with other degenerative diseases such as multiple sclerosis 	<ul style="list-style-type: none"> • Activation of the immune system and the production of defense cells • Stimulation of programmed cell death (apoptosis) in cancer cells and blockage of angiogenesis (new blood supply) • Protection and stabilization of the DNA of healthy cells against damage caused by cytostatic drugs, such as chemotherapy • Improvement in general well-being • Reduced fatigue, particularly during and after chemotherapy • Reduced nausea during chemotherapy • Improved appetite, sleep, increased energy • Patients often report a more positive outlook, more courage, and initiative, less fear 	<ul style="list-style-type: none"> • Increased energy • Improved concentration • Improved cognitive function • Increase the levels of iron & hemoglobin in the body • Oxygenation to cells • Important for thyroid function 	<ul style="list-style-type: none"> • Fights the physical effects of aging • Reduces depression and anxiety • Mitigates effects of EMF exposures • Combats chronic fatigue • Helps autoimmune/ inflammatory diseases • Can help with weight management • Repairing and protecting DNA • Gene expression • Extracting cellular energy from nutrition • Maintaining mitochondrial function • Chromosomal integrity preservation • Calcium signaling • Epigenetic and posttranslational modifications • Slows Cognitive Decline 	<ul style="list-style-type: none"> • Kills bacteria, viruses, fungi/yeast and parasites • Stimulates the immune system to help speed healing • Improves circulation – stimulated microcirculation • Normalized hormone and enzyme production • Anti-inflammatory and helps reduce pain • Decreases stroke damage • Improves brain function and memory • Improves stamina and recovery from exercise • Anti-aging benefits due to stimulating the body's own production of antioxidants
High-dose Intravenous Vitamin C (IVC) is used to treat a wide variety of conditions and promote wellness. This protocol is recommended for individuals struggling with a long-term illness. There are many conditions that may benefit from IVC therapy such as Arthritis, Lyme disease, other bacterial infections, viral infections, pain after injury, and more.	Poly-MVA is emerging as an important nutritional therapeutic means of supporting immune health, mitochondria, and cellular repair. It is a patented type of palladium lipoic acid complex composed of lipoic acid, the mineral palladium, and thiamin bonded in one molecule. It's MUCH more potent than regular lipoic acid. Poly-MVA also contains other vitamins, minerals, and amino acids.	Mistletoe extracts stimulate the immune system. Studies in humans show that mistletoe treatment can improve symptoms and reduce side effects of cancer treatments. It has been used for hundreds of years to treat medical conditions such as epilepsy, hypertension, headaches, menopausal symptoms, infertility, arthritis, and rheumatism . Mistletoe is one of the most widely studied complementary and alternative medicine therapies for cancer.	Infusion therapy delivers iron directly into your bloodstream. This means you get faster, more effective results — which is preferred to treat people with severe iron deficiencies. It's also an ideal alternative for people who cannot take oral medications or for people whose digestive system is failing to absorb iron.	NAD + is helpful for those who suffer from reduced energy levels, feel sluggish and fatigued, or feel like their mind is continuously foggy. Also for those who are struggling with the side effects of aging or who suffer from certain age-related illnesses or chronic conditions . This treatment can also be used for athletes who want to enhance their performance and endurance and speed up their recovery times after intense exercise or an injury.	Ozone therapy is toxic to unhealthy cells while being non-toxic to healthy cells. Ozone use has gradually been spreading in America over the last 25 years in medical, dental, and veterinary offices. This biological therapy is often administered for all infectious diseases as well as for chronic conditions such as chronic fatigue syndrome, arthritis, Alzheimer's disease, multiple sclerosis, other forms of dementia, fibromyalgia, heart disease, and many more.
